ABOUT COMPANY

OUR MISSION

Peroni is a Russian company created by Maria and Roman Petchenko. Our mission – to make new image of Russia in the world community. We want that the country will be associated not only with nesting dolls and traditional boots, but also with natural high-quality, tasty products, and what can be more natural and tasty than honey!

For 5 years of work we managed to change people's idea of honey. We created a new niche – honey-souffle (cream-honey) with additives. Honey became a delicacy. It was trusted on supermarket shelves, and the need is growing every year. We have shown that Russian products can be not only of high quality, but also refined, satisfying the needs of Russian and international market. And this is only the beginning. We consider that such a useful and tasty product should become an integral part of consumption in every family!

HONEY-SOUFFLE

Honey-souffle Peroni Honey is not just honey, it's an unusual honey treat. Delicate taste, unique consistency and appearance amaze and surprise from the first to the last spoon. A full range of products is attached to this presentation.

TECHNOLOGY

Technology for obtaining honey-souffle was invented in 1928 in Canada by professor of beekeeping J.J. Dyson. Honey is mixed for a long time in a certain mode, after which it is kept at low temperatures, thereby forming and fixing its delicate consistency. All useful properties of honey are preserved, as the temperature regime is strictly controlled.
